THESEN

— WARM CONTEMPORARY

SCHEME 03

THESEN

WARM CONTEMPORARY

Named for Thesen Island, Thesen is the most masculine of the three schemes. Rich smoked oak and walnut joinery set up darker contrasts against limestone and textured stone, while matte black tapware, fittings and leather accents keep the detailing monochromatic and sharp. Gunmetal finishes and striped weaves add depth without softening the modern edge.

BUILT FOR THE MODERN ADVENTURER

— These suits owners who want an interior with presence. Deep timber tones and black detailing give each space a grounded, tailored feel that stays composed after a long passage, and provides a strong backdrop for leather, stone and the gear of a life spent on the water.
